Testimonial Letter for Dr. Benjamin Fitzner

First of all, having talked with chiropractors from another Chiropractic university, I learned that Life University is an outstanding Chiropractic university with a great philosophy for patient wellness and well being.

I had two accidents that gave me pain in the neck that I lived with and didn't know were subluxation; a word I was not familiar with before seeing Doctor Fitzner. I assumed the pain was muscle related. One accident was from being hit from the rear by a tractor-trailer in the 1970's and the other was hitting my head in an accident in the 1980's. At no time was chiropractic treatment suggested.

After the second week of seeing Dr. Fitzner, I realized that I had been in pain for a long time and had just accepted it. At the end of the first twelve weeks with Dr. Fitzner's treatment, I was almost completely pain free, my neck was more mobile and my blood pressure lower. I continued treatment and now I consider myself relieved of an abnormal level of pain.

My wife, Dee, was so impressed that she started to receive treatment about six weeks after me. She no longer has low back and shoulder pain in the morning.

Sincerely,

George E. Vaughan, III
